MEMORANDUM FOR: Director of Central Intelligence

SUBJECT:

Position of the Director of Central Intelligence in the Governmental Hierarchy

- l. This memorandum contains a recommendation submitted for approval of the Director of Central Intelligence. Such recommendation is contained in paragraph 5.
- 2. I suggest that this would be an appropriate time for you to consider action to adjust the position of the Director of Central intelligence in the over-all Government etructure. I have reference solely to the relative placement of the Director of Central intelligence on the roll of Federal executives.
- 3. It is unnecessary for me to attempt to discuss the importance of the role of the Director of Central Intelligence and his intimate relationship with the President, the National Security Council, the Secretary of Defence, the Secretary of State, the Chairman of the Joint Chiefs of Staff and others. With a new Director of Central Intelligence already selected by the President, any recommendations that you might have would be free from personal connectations.
- 4. The basic statute establishing relative positions in the Federal Enecutive Pay Act of 1956 (FEFA). There has been no general amendment to that Act nor have the salary scales established therein been adjusted. On the other hand, there have been items of legislation which have changed relative positions in certain cases.

STAT

the barries and and

For sample, the Mirester of Mil was in the same category as the Moster of Control Intelligence (Category IV of FEFA) but was chilled appeard to a reak of Union Secretary of State in Category II and the new Administrator of AM to placed in Category II. Further, there have been several calary increases in the Government generally as well as in the Foreign Service and the Military pay structures which contributed substantially to an imbalance of FEFA salaries within the already diff of balance total Government compensation structure. For ready reference there is attached as Appendix "A" a complication of pay groupe beginning at \$20,000 per amount. I have indicated within each salary group the FEFA entegories.

- 5. Recognizing that compensation is not the sole measure of a Poderal afficial's position in the bioversky as to either prestige, responsibility or authority, nevertheless, his relative placement among Federal executives has eignificance. While I have set up the various pay groups for comparison purposes on the basis of annual compensation, I do not believe it appropriate that an approach to the adjustment of the Director of Central Intelligence's position should be done on a dallar basis. As indicated previously, salary increases for the Military and for Foreign Service have been exacted but FEPA remains the basic statute in which the relative positions of Federal encentives are established. There have been several studies concerning revision of executive pay seales and it is certain the Administration will be making recommendations on this subject to the Congress in the coming year. It is to be assumed that whatever action is taken will establish a proper level of compensation for Fodoral essentives but the specific amount of that componention is not the issue in adjusting the position of the Director of Control Intelligence. Therefore, the basic approach should be to place the Director of Control Intelligence's position in the proper entagery of FEPA relative to other Federal encountree.
- 6. Although there has been one position equated to Category I of FEPA other than the 16 ashinet efficient, i.e., the Streeter of the Office of Emergency Planning (formacky Streeter of OCDA), it is not not believed appropriate or destrable that the Streeter of Control intelligence should be so placed. A review of Categories II and III would indicate the Streeter should be placed in Category II which includes the Section Secretary of State and Departy Secretary of Business. Legislative transfer since 1956 has placed in that category the Admirablestary of

MASK, the Mirector of Arms Central and Measurement Agency, and the Administrator of ASD. It is interesting to 2005 that in 1957 the Chairman of the Atomic Beergy Commission was placed by Category I just a year before hir. McGone was manufacted to that position. Therefore, it is recommended that you approve action being taken to explore piecement of the position of the Miroster of Central Intelligence in Gategory II and pincoment of the position of the Bopaty Director of Control Intelligence in Gategory III.

- 7. There remains for empideration the question of how to somplish this. Costainly considerable exploratory week should be done before submission of appropriate legislation to the Bureau of the Budget under the routine process.
 - a. The normal method would be to draw up as amondment to the existing logislation, i.e., PEPA. Nowever, this has definite drawbacks in that it would throw consideration of the proposed legislation into the Post Office and Civil Service Committees and would tend to open Pandova's best to other agencies and individuals seeking adjustments.
 - b. Another possibility would be to insert appropriate provisions in other proposed legislation to be considered by the Armed Services Committees. This could be explored earefully with the Repartment of Bulouse.
 - c. A third method would be to make provision for this adjustment in other necessary legislation directly relating to GIA and thus having it considered by the two Armed Services Committees. There are some miner núministrative amendments which are decirable and which could be used as a vehicle for this.
- 6. The various methods entitled above should be quietly employed while other spedewests to going forward which should because discuscions with General Taylor and passibly the Chairman of the two Armod Services Germulthese. It is known, for emempie, that Semester Associatives corpoland at leasuing the low rate of pay received by the Prisonless of Control Intelligence upon reading the reasons management Transmitting the apprintment of his. McConc. It to believed Screen Accordi would strongly request an equand effectment as social black Vinine

CA Cita

- rece a general plan for ad instruents of coloutes for Pedeval res it to pessible that this too could be a mathed of procuring notinent of relative position for the Mirector of Control once. However, this has the elvions danger of getting con in the general shalle for position and it would some prosuch an earlier adjustment through other legislation.
- 16. For general hadiground and to demonstrate the limbalance of the over-all Covernment pay structure, it is pointed out that each of the Joint Chiefs receives compensation of \$60,126 per course and Ambassadore of Class I Missions receive \$27,500 per ensum, while \$27,500 the top category under FZPA, that is the 10 cabinet positions, remains at \$25,000 per ansum. It is interesting to note that at the time of the passage of FEPA there were 16 individuals in the first three entegeries under FEPA with the Director of Control Intelligence's position falling into Category IV and today there are appreximately 160 positions in Government with componenties in excess of the calary provided for Category IV under FEPA.
 - 11. As a further example, it is of interest to compare compensation and responsibilities of the Director of Central Intelligence with these of the Joint Chiefe of Staff. The Birector of Control Intelligence is the principal advisor to the Procident and the Notional Scourity Council on intelligence matters affecting the notional security. The Joint Chiefs of Staff by law are the principal military advicers to the Precident, the Matienal Security Council, and the Socretary of Defense on military matters. The Measter of Central Intelligence is in the \$21,000 per annum entegery and the Chairman of the Joint Chiefe of Stall, the Chiefs of Staff of the Army and Air Porce, Chief of Naval Operations, and the Geramandant of the Marine Corps each receives total pay and munns tog dii. 15t le connectie
 - 13. If you agree that there should be an upward adjustment in the positions of the Biroctor of Cantoni Intelligence and the Deputy Director of Central Intelligence, it would seem most appropriate that you take a strong position on this in any recommendations or final report you saight be making to the Provident upon leaving effice.
